

**NEW**

The Nova Polymers Color Pro is a Game-Changing Solution for Sign Makers who want to Increase their Ink Tipping Processing and Speed

- It handles sign standard ink brands for easy color matching flexibility
- Uses a conveyor belt feed with ink roller application for raised areas of signs
- Quick set-up, easy height adjustment, and simple operation, making training a breeze
- Easy conveyor belt leveling and belt speed
- Height adjustment range of 0.020" to 1" substrate thickness allows for a wide range of applications
- Ink application passes can be adjusted to achieve desired opaqueness
- Fast! Clean-up or ink changeover takes only 10-15 min
- Using Nazdar inks and first surface painting means that there's no need for polymer sign clear coating

MADE IN THE USA
