

Novacryl® Permaglow 250TM

When seconds count in a building emergency, provide your customers with the optimum solution for safety and egress signage using Nova Polymers 100% compliant, glow in the dark braille/ADA photopolymer sign substate, Permaglow.

Permaglow absorbs light quickly to provide a photoluminescent way out in the darkness of an emergency while also providing durable, raised braille cells that are resistant to vandalism.

Ideal solution for:

- Evacuation routes
- Emergency exits
- Hallway and building exits
- Stairwells
- Fire extinguishers
- Fire hoses
- Floor levels
- Emergency communication device locations

Novacryl Permaglow Performance Specification:

- UL 1994 listed product
- 22.5x brighter than standard glow illumination
- Luminance is at 250 milli candelas per square meter (mcd/m) after 10 minutes
- Luminance 30 milli candela per square meter (mcd/m) after 60 minutes full darkness
- Full luminance after exposure activation of 1,000 Lux Xenon Lighting of only 5 minutes, per ASTM E2073-02
